

# Garage Streamline Website Disclaimer

**Last updated: September 2026**

## 1. General Information

The information provided on the Garage Streamline website is intended for general information purposes only.

Garage Streamline makes reasonable efforts to ensure that information published on the website is accurate and up to date. However, vehicle specifications, product availability, service information, prices, estimated timescales and other information may change without notice.

Information on the website should not be treated as a substitute for a professional inspection, diagnosis or assessment of a specific vehicle.

Garage Streamline reserves the right to correct, update or remove website content where necessary.

## 2. Vehicle and Technical Information

Any technical information, specifications, guidance or descriptions relating to vehicles, components, repairs, servicing, modifications or performance are provided for general information.

Vehicle condition, specification, previous modifications, maintenance history and intended use can vary significantly. Information that may be appropriate for one vehicle may not be appropriate for another.

Garage Streamline recommends that customers obtain appropriate professional advice and assessment before carrying out repairs, modifications or performance-related work.

No information on the website should be taken as confirmation that a particular modification, component, setup or repair is suitable for a specific vehicle unless Garage Streamline has expressly assessed and agreed this with the customer.

## 3. Performance Tuning and Vehicle Modifications

Performance modifications, ECU tuning, remapping, engine modifications and other changes to a vehicle can affect its performance, reliability, emissions, noise, fuel consumption, drivability, insurance requirements and legal compliance.

The suitability and legality of any modification may depend on the vehicle, its specification, intended use and applicable legislation.

Customers are responsible for ensuring that their vehicle remains appropriately insured, registered and compliant with applicable legal requirements following any modification.

Garage Streamline does not guarantee that a modified vehicle will remain suitable for road use, pass an MOT, satisfy an insurer or comply with any particular regulatory requirement unless this has been specifically assessed and agreed.

Where performance work is undertaken, the applicable Garage Streamline Terms of Service and any specific quotation, booking conditions or disclaimer will apply.

## **4. Rolling Road and Dyno Testing**

Rolling-road and dyno testing involves operating a vehicle under controlled but demanding conditions.

There are inherent risks associated with testing and performance tuning, including the possibility of mechanical, electrical, thermal or component failure.

The Garage Streamline rolling-road dyno is a Mustang 4WD system installed within the workshop. Appropriate fans, cooling and extraction systems are used, but these measures cannot eliminate all risks associated with dyno testing.

Customers must read the separate **Rolling Road Dyno Information / Disclaimer** before booking or using the dyno.

Dyno bookings are subject to the applicable Garage Streamline Terms of Service and Rolling Road Dyno Information / Disclaimer.

## **5. Previous Garage Streamline Work**

The fact that Garage Streamline has previously carried out work on a vehicle does not mean that Garage Streamline accepts responsibility for subsequent failures, deterioration, modifications or changes to the vehicle.

Any warranty or workmanship coverage applies only within the terms and period expressly provided for that particular work.

The Garage Streamline Terms of Service contain further information regarding workmanship, warranties, customer-supplied parts, used or refurbished parts and subsequent modifications or third-party work.

## **6. Prices, Services and Availability**

Prices and service information displayed on the website are provided for general information and may change.

A website price does not necessarily constitute a quotation or fixed price for a particular vehicle or job.

The final scope and price of workshop work may depend on the vehicle's condition, diagnosis, parts required, additional faults discovered and the work reasonably necessary to complete the agreed service.

Where appropriate, Garage Streamline will provide an estimate or quotation before work proceeds.

Parts availability, supplier pricing and estimated timescales may also change without notice.

## **7. Website Availability and Accuracy**

Garage Streamline aims to keep the website available and functioning correctly but does not guarantee that the website, its content or any particular feature will always be available, uninterrupted or error-free.

Garage Streamline may update, suspend or withdraw parts of the website without notice.

Although reasonable care is taken when preparing website content, Garage Streamline does not guarantee that the website is completely free from errors, omissions or inaccuracies.

## **8. Third-Party Websites and Services**

The Garage Streamline website may contain links to third-party websites, suppliers, manufacturers, booking services or other external resources.

These links are provided for convenience and information.

Garage Streamline does not control or accept responsibility for the content, availability, security, privacy practices or services of third-party websites.

Customers should review the applicable terms and privacy policies of any third-party website or service they use.

## **9. Website Enquiries and Bookings**

Submitting an enquiry through the Garage Streamline website does not itself create a booking or contract for workshop work.

An enquiry allows Garage Streamline to discuss the customer's requirements and, where appropriate, provide further information, an estimate or quotation.

Workshop work is subject to the applicable Garage Streamline Terms of Service and any agreed quotation, estimate or booking arrangements.

Dyno bookings made through the website are subject to the applicable Terms of Service and Rolling Road Dyno Information / Disclaimer.

The customer will be given the opportunity to read the applicable terms before being bound by them.

## **10. Liability**

Nothing in this Website Disclaimer excludes or limits any liability that cannot lawfully be excluded or limited, including liability for death or personal injury caused by negligence, fraud or fraudulent misrepresentation, or any statutory rights that apply to consumers.

Subject to those limitations, Garage Streamline is not responsible for losses arising solely from a customer's reliance on general website information where that information was not provided as specific advice for the customer's vehicle or circumstances.

Customers should contact Garage Streamline directly where they require specific advice regarding a vehicle, repair, modification, dyno session or other service.

## **11. Relationship with Other Garage Streamline Documents**

This Website Disclaimer applies specifically to information provided through the Garage Streamline website.

It does not replace or override the Garage Streamline Terms of Service, Rolling Road Dyno Information / Disclaimer, Privacy Policy, quotation, estimate or any other specific agreement applicable to a customer's booking or work.

Where there is a conflict between general website information and the specific terms agreed for a customer's work or booking, the specific applicable terms will take precedence.

## **12. Contact**

If you have any questions about information provided on this website, or require specific advice regarding your vehicle or the services offered by Garage Streamline, please contact Garage Streamline directly.
